Available Tables

You have the following 3 tables available on
https://www.programiz.com/sql/online-compiler/. Complete the tasks given below using
data from these tables -

Customers [-]
- customer_id [int]
- first_name [varchar(100)]
- last_name [varchar(100)]
- age [int]
- country [varchar(100)]

Orders [-]
- order_id [integer]
- item [varchar(100)]
- amount [integer]
- customer_id [integer]

Shippings [-]
- shipping_id [integer]
- status [integer]
- customer [integer]

Query Set - 1 - Basic Queries

Task - 1 : Retrieve basic customer information (First Name, Last Name, Country)

Task - 2 : List orders with amounts exceeding a threshold (say 50).

Task -3: Count the number of delivered orders.

Query Set - 2 - Intermediate Queries

Task - 1 : Details of orders with customer names

Task - 2 : Total order value per country.

Task -3: Number of orders for each shipping status.

Task - 4: Total sales per country

Task - 5: Full order details including customer and shipping information

Task 6: Products frequently ordered together (Identify products in the same order by the same customer)

Query Set - 3 - Slightly More Complex Queries

Task -1 : Orders with items above the average item price

Task - 2 : Top 3 Customers with highest order amount.

Task -3: Find customers with no orders.
